

Linking **SCIENCE** and Service

CRI CENTERSTONE
RESEARCH
INSTITUTE

Centerstone Research Institute (CRI) is dedicated to improving healthcare through the integration of research and information technology. We work to create a brighter future for individuals and families by bridging the gap between science and service.

We provide industry-leading **research, analytics** and, **evaluation services** for Centerstone and outside organizations. We are also the administrative arm of Centerstone's **Center for Clinical Excellence**, information technology and grant writing teams.

Research: Through our network of academic and industry partnerships, we promote **research that fosters the adoption of treatment advancements more quickly and effectively.** We partner with behavioral and healthcare providers and clinical research leaders from technology and other key industries.

Analytics: Our work involves **data warehousing, business intelligence, and predictive algorithms to help providers effectively interpret and apply data to improve patient care and operations.** We produce high-quality applications and quantitative analyses across operational, financial, quality, clinical, and other measurement areas.

Evaluation: Our **Evaluation Services provide industry-leading research and assessment of treatment and prevention programs to measure effectiveness and results.** We provide a systematic exploration and judgment of processes, documentation of experiences, and health outcomes measurement for a wide variety of programs.

The **Center for Clinical Excellence** works to improve quality of care and patient outcomes through accelerating the adoption of the most effective practices within Centerstone and beyond.

Our expertise in **informational technology** includes efforts ranging from help desk support and training to sophisticated product development. Our IT staff champions the use of technology to advance care and, in turn, saves our clients thousands of

Our **grant writing** team has secured more than \$130 million in private and government funding since 2003. Secured federal and state grants fund not only service implementation but also research studies that support and advance behavioral healthcare. In addition, our philanthropists' generosity enables CRI to pursue truly transformative projects that change the face of how mental healthcare is delivered on a larger scale.

KEY STATISTICS

More than 33 million Americans seek help for behavioral health and addiction disorders each year.

Sixty percent of these individuals - nearly 20 million people - will not receive the appropriate care for their condition.

Research shows an alarming 13-17 year delay between significant treatment breakthroughs and the standard use of those treatments in clinical settings.

CRI has received the SAMHSA Science and Service Award, National Council for Community Behavioral Healthcare's Innovation Award, and TDWI (The Data Warehousing Institute) Best Practices Award.
